

Workshop: Developing Vocabulary and Sentence Building with ALIEN TALK.

Melbourne University, Hawthorn Campus, September 2018

ALIEN TALK is fun and versatile program used in many schools around Australia. It can be used in its entirety or its plentiful resources can be used to complement other vocabulary and sentence-building programs.

Alien Talk is loved by many speech pathologists who run Alien Talk in individual sessions and groups.

Alien Talk explicitly targets each element of a simple sentence – the subject, verb, object, adjectives, adverb, adverbs of place and adverbs of time. It then brings them all together to make rich, grammatically correct and meaningful sentences. It includes components of vocabulary enrichment, grammar exploration (past, present and future tense) and spelling (the learning of suffixes that relate to each sentence part).

Alien Talk is used as an oral program in Foundation but in later years, the program incorporates reading and writing tasks.

By the end of the workshop, participants will be able to:

- 1) recognise each alien's function and demonstrate the cues for each
- 2) introduce and study each alien using motivating tasks appropriate for each student's level of functioning
- 3) recognise the possible levels of breakdown in sentence formation and overcome these
- 4) plan Alien Talk lessons/sessions and decide when to progress to the next stage of the program
- 5) incorporate the use of Alien Talk cues into other oral language, reading and writing tasks that arise throughout the day
- 6) utilise best practice teaching methods for vocabulary growth

Participants receive the 2018 version of ALIEN TALK resource as part of their training. *Valued at \$95*

- **WHO SHOULD ATTEND:** Teachers, speech pathologists, ISAs, principals, tutors.
- **WHEN:** Thursday 13th SEPT 2018 9.30 am – 3.30 pm
